The 2019 Math Olympiad will be held on Saturday September 21st. For registration, please visit here.

2020 International Math Contest - RSM Foundation
The International Mathematical Olympiad (IMO), founded in 1959, is one of the most competitive and highly intellectual activities in the world for high school students. Even before IMO, there were already many countries which had mathematics competition. They were mainly the countries in Eastern Europe and in Asia.
A Collection of Math Olympiad Problems - Ghent University

The International Mathematical Olympiad (IMO) is an annual six-problem mathematical olympiad for pre-college students, and is the oldest of the International Science Olympiads. The first IMO was held in Romania in 1959. It has since been held annually, except in 1980. More than 100 countries, representing over 90% of the world's population, send teams of up to six students, plus one team leader, one deputy leader, and observers. The content ranges from extremely difficult algebra and pre-calculus.

International Mathematical Olympiad
We try to gather such problems. If you have anything of this kind, we will appreciate receiving it. For now we offer two problem sets with 1878 problems in total. Mathscope - a collection of problems selected from Vietnamese math journals (particularly Mathematics
and the Youth from the last 10 years), compiled by Phạm Văn Thuận.

International Mathematics Olympiad - TU/e
If you are, then this list is for you. This list contains more than 30,000
mathematics contest problems, many of which, have solutions and answers. Some of the links were taken from more than 14,000 problems collected by Art of Problem Solving ...

Shortlisted Problems with Solutions
This page lists the authors and the proposing countries of the problems of the IMO. For many problems, the composers do not have the nationality of the proposing country. For instance, problem 2009/4 was proposed by Belgium, but only two of the three problem authors were Belgian, whereas the third is from South-Korea.

The International Math Contest is a 30-minute Online Challenge based on leading math curricula from across the world. ... The Online Challenge also serves as a qualifier for the Russian Math Olympiad: a challenging Olympiad in the tradition of European Mathematical Olympiads with complex problems that promote a deeper level of thinking for even ...

More than 20,000 mathematics contest problems and solutions
As mathematician Simon Pampena explains the Numberphile video above, the Legend of Question 6 spawned from a maths competition for high-schoolers held in Australia in 1988. (Yep, they make 'em tough down here.) The competition was the International Mathematical Olympiad, which is held every year in a different country, and
only six kids from every country are selected to compete.

**International Mathematical Olympiad**

A set of lines in the plane is in general position if no two are parallel and no three pass through the same point. A set of lines in general position cuts the
plane into regions, some of which have finite area; we call these its finite regions. Prove that for all sufficiently large \((n)\), in any set of \((n)\) lines in general position it is possible to color at least \((\sqrt{n})\) of the ...
